ArticulatED ™
Multi-Institutional Portals and CMS

Improving Student Experience and Success in a Mobile World

Increasingly students are on the move in their quest to earn a postsecondary credential. According to a study conducted by the Government Accountability Office, one in three students will transfer during their higher education journey. Due to a lack of transparency within the process, most will lose a significant amount of the credits they have already earned or find out they will not count toward a degree. States, higher education systems and institutions aspire to better serve students, so they won't have to spend more time and money than necessary to complete a degree.

ArticulatED™ empowers multi-institutional student success initiatives with intuitive workflow and publishing tools. It integrates software and applications that utilize a shared repository of data to evaluate and promote how all types of learning is equivalent to college credit. Provide a single, centralized and trusted source of transfer information, services, and resources for your students so they can be more confident in their academic planning. ArticulatED™ includes a content management system to publish shared institutional information.

Productivity Unleashed
Provide faculty and staff with tools that bridge data, while reducing duplicative effort and manual tasks.

Community Connectivity
Integrate information and structured processes across departmental and institutional boundaries.

Improve Transitions
Bring transparency to academic credit portability and reduce the risk of taking unnecessary coursework.
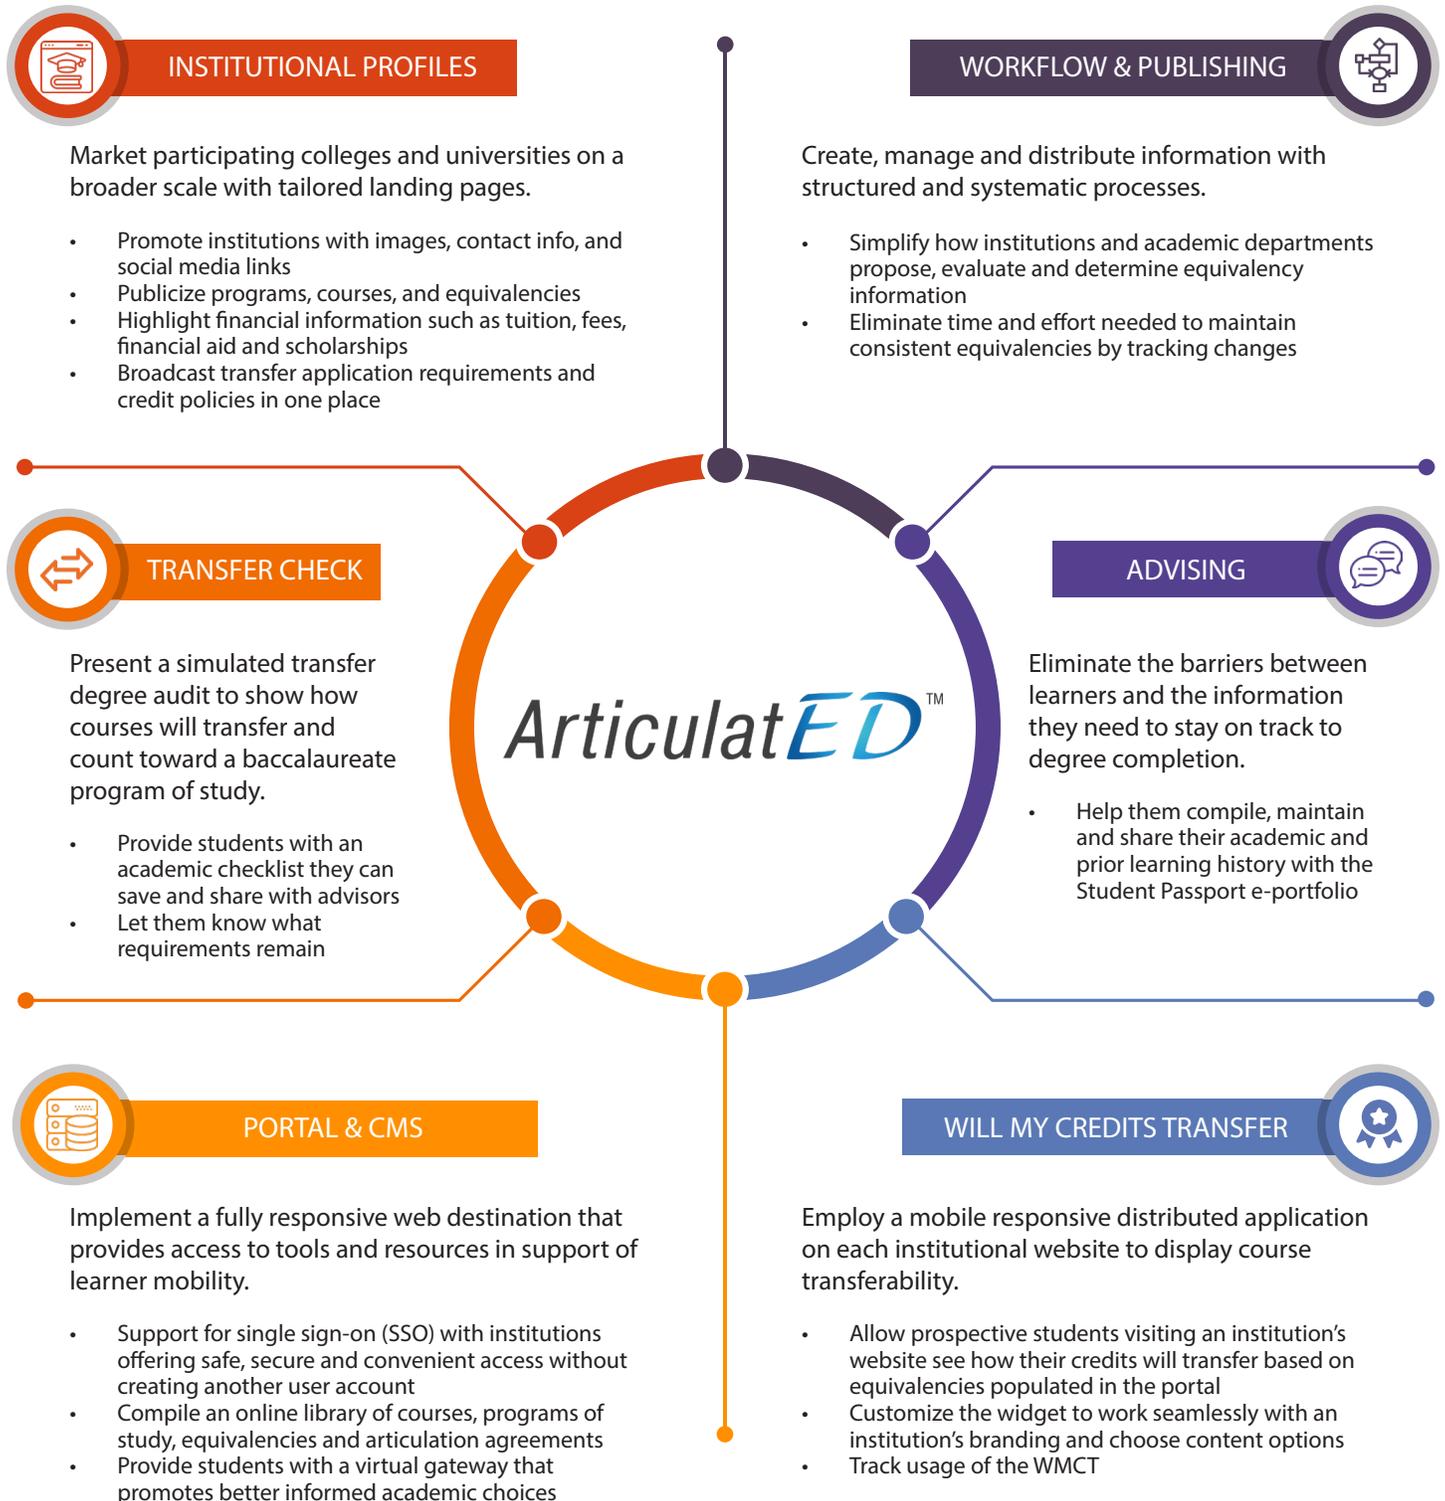

Proactive Guidance
Improve access and success with readily available and straightforward self-service advising applications.

AcademyOne

Improve Coordination and Outcomes across Institutions

INSTITUTIONAL PROFILES

Market participating colleges and universities on a broader scale with tailored landing pages.

- Promote institutions with images, contact info, and social media links
- Publicize programs, courses, and equivalencies
- Highlight financial information such as tuition, fees, financial aid and scholarships
- Broadcast transfer application requirements and credit policies in one place

WORKFLOW & PUBLISHING

Create, manage and distribute information with structured and systematic processes.

- Simplify how institutions and academic departments propose, evaluate and determine equivalency information
- Eliminate time and effort needed to maintain consistent equivalencies by tracking changes

TRANSFER CHECK

Present a simulated transfer degree audit to show how courses will transfer and count toward a baccalaureate program of study.

- Provide students with an academic checklist they can save and share with advisors
- Let them know what requirements remain

ADVISING

Eliminate the barriers between learners and the information they need to stay on track to degree completion.

- Help them compile, maintain and share their academic and prior learning history with the Student Passport e-portfolio

ArticulatED™

PORTAL & CMS

Implement a fully responsive web destination that provides access to tools and resources in support of learner mobility.

- Support for single sign-on (SSO) with institutions offering safe, secure and convenient access without creating another user account
- Compile an online library of courses, programs of study, equivalencies and articulation agreements
- Provide students with a virtual gateway that promotes better informed academic choices

WILL MY CREDITS TRANSFER

Employ a mobile responsive distributed application on each institutional website to display course transferability.

- Allow prospective students visiting an institution's website see how their credits will transfer based on equivalencies populated in the portal
- Customize the widget to work seamlessly with an institution's branding and choose content options
- Track usage of the WMCT

AcademyOne is a software development and consulting company serving the higher education community. We deliver solutions that bridge digital experiences to resolve the challenges and complexities inherent to global academic credit portability, the recognition of prior learning and credentialing.
