

# AwardED™

Streamlining Reverse Transfer

"Our statewide reverse transfer initiative has twenty-eight participating institutions. Working together, we have awarded thousands of Associates degrees to deserving students that had transferred early. The AcademyOne software has significantly reduced both the time and effort needed to achieve these outstanding results."

Nancy Dietrich  
University of Tennessee, Project Director  
Office of Academic Affairs & Student Success

## A Secure Automated Workflow Shared Between 4-Yr and 2-Yr Institutions Supporting Reverse Transfer

With so many two-year students transferring before finishing their two-year credential, 2-year and 4-year institutions have been trying to work together to address the reverse transfer possibilities, only to be limited by their technology and painfully slow processes. The sequence to procure learner permission, the methodology to exchange student academic histories and the process to transform the data to run multiple permutations of a degree audit, is both arduous and labor intensive.

AwardED™ is engineered to automate the sequence of steps and coordination among two or more institutions working together. Small groups of institutions can work together or an entire State can optimize the shared potential of automating Reverse Transfer. All institutions are given a dashboard, reporting analytics and access to tools to upload and download their activities coordinated with centralized timelines. Take your Reverse Transfer to the next level and automate the process to find, promote, opt-in, assess, guide and award learners who have accumulated enough credits satisfying their two-year credential requirements.

### Engage Potential Students

Increase participation often stymied by a lack of awareness with an opt-in consent.

### Systematize Degree Audits

Automatically run audits on consenting students to pre-determine eligibility for formal review.

### Guide Near Completers

Inform them of outstanding requirements and ensure inclusion in the next cycle.

### Award Earned Credentials

Motivate those who have merited a degree to persist and finish their baccalaureate.
